

## Safe Administration of Medicines

*On a medication you come to the clinic to have administered?*

Even if COVID is in the community we will make sure you can safely come to have your medication. It is important that you keep coming for your injections to stay healthy and strong.

The clinic will continue to provide your regular injections.

We don't want you to come and wait in the clinic with people that may be sick, so injections will be administered at the

**blue building behind the clinic in the afternoons.**

The clinic will call you and let you know when your injection is due and what time to come. Transport can be organised if you need it.

When you come for your injection, clinic staff will be in protective clothing, you will be asked to wear a facemask. **This is to keep everyone safe.**

Between each patient, the area will be cleaned so you don't need to worry.

If you have any questions, please talk to the clinic staff.
